## Minutes

### Introductions

- - name and home city typed in chat

### House Rules

- -how to act during meetings

### Why are we here?

- -to make things better at BCIT by 1%

### BCITSA and BCIT

### Student Association Services

- - Listed all services provided

### Set Rep Story

- -calista- Do you have any examples of problems that have been addressed by set reps and the series of events that they went through during the process?
- Danny mentorship problem feeling

### Advocacy

- \$0.25 fee for each student for dietitian example

### Open Forum

- Melissa asked "how do we access the health services? Do we need to get a card?"
- Walter asked " in MRAD program very limited lab time to do any sort of open lab time (to practice patient care, patient position etc) students are hurting for time to practice" "For exams we are doing them all online over proctoring, we're having a lot of issues setting it up. ¾ times we've used proctoro we've encounters problems"
- Mandroop "we have no place to eat lunch between labs, we've been eating outside. Which is fine when there's good weather but it's going to be a problem once it starts raining."
- Mandroop "We have one classroom with a 6 person limit! but 24 people on break at the time. Doesn't quite work out."
- Erik " We've all been struggling with the shortened lab time, previous years have had much more time to practice. We've also been struggling with somewhere to socially distance during breaks between labs"
- Erik " is BCIT planning on opening up any intramural sports?"

- Melissa “In MRAD our program head has given us two classrooms for our lunch time, not sure if this is helpful but maybe a program head could help?”
- Walter “Building on that - students who take public transit are relying only on washrooms to change into scrubs at the moment. It seems to be ok at the moment though”
